

**Powder Coating colours
for decor & industry**

PACIFICGOLD[®]

The Pacificgold[®] colour range

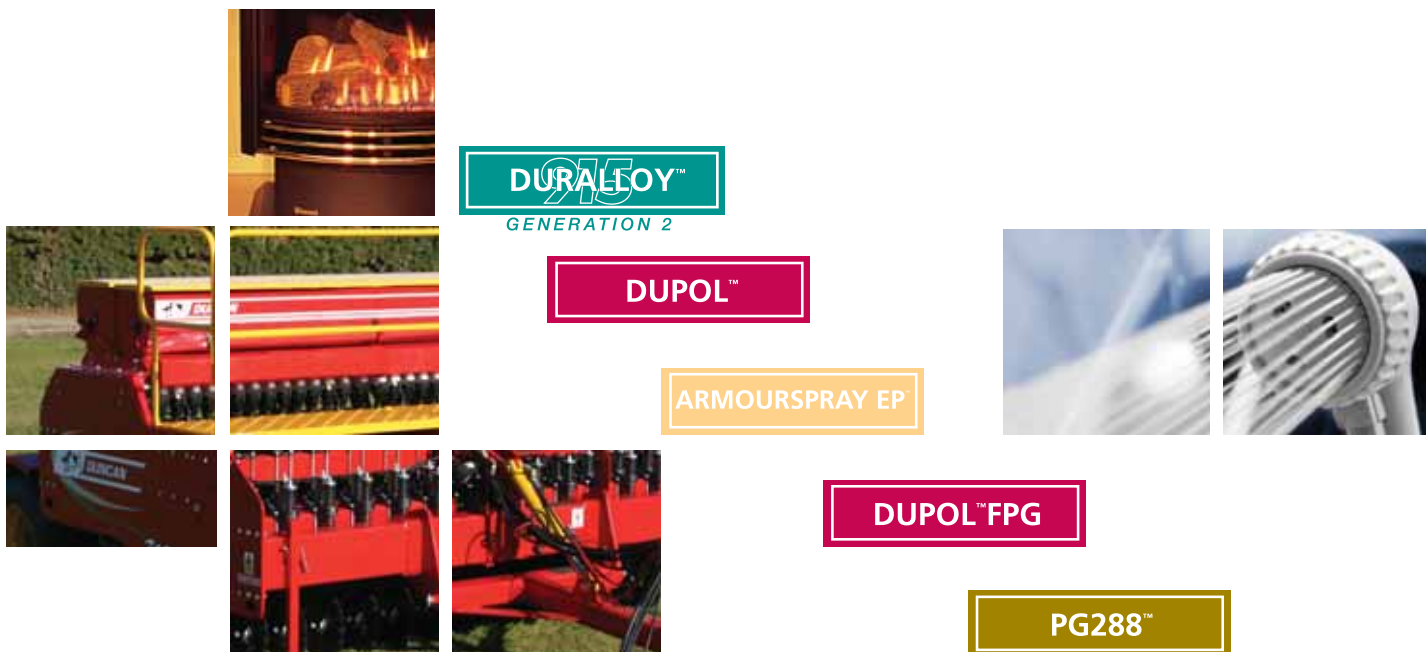

These colours have been selected to provide an exciting range of finishes for principally, industrial applications. These finishes have not been designed for architectural applications and further information should be sought before specifying any of these colours for Architectural joinery, cladding or fittings.

Information included in the colour matrix on this colour chart includes an estimation of the expected exterior durability of each colour on a scale of 1 - 5 where 1 is an interior only colour through to 5 where the colour is rated as very light fast. These values are estimations only and no warranty is attached or expressed.

Gloss levels are detailed as are light reflectancy percentages. Each colour has an RGB value for use with computer aided design programs where colour representation is required. The colours represented on this colour chart are indicative only. They are as close to the actual product colours as modern printing processes allow and have been matched to outdoor daylight viewing. The colour appearance may vary according to light source.

Where colour is critical, samples of the actual powder coating should be sought from Dulux Powder & Industrial Coatings.

When specifying these colours, be sure to specify the entire product reference and name. There are examples of different products having the same name for quite different colours or finishes.

Intelligent Coatings 24•7

Clinikill™ is a very effective tool in the control of bacteria, yeast and fungi. Clinikill™ is available in most powder coating chemistries, colours and Special FX products and as a consequence may be used in a myriad of environments. All of the products illustrated on this colour card, may have the Clinikill™ technology incorporated.

Independent testing by specialist external laboratories to the Japanese industrial Standard JIS Z 2801:2000 has shown Clinikill™ technology to be effective against many strains of bacterium, fungi and yeast.

Examples of bacteria tested.
Bacillus cereus,
E.coli,
Pseudomonas aeruginosa,
Staphylococcus aureus,
Methicillin resistant,
Straphylococcus aureus (MRSA),
Salmonella enteriditis.

Clinikill™ is available in most powder coating technologies, from pure Epoxies, through Polyester / Epoxy Hybrids, standard and High Durability Polyesters, Antigraffiti products and Powder Coatings designed for use with heat sensitive substrates.

TO SPECIFY

Utilise the Clinikill™ brand accompanied by the desired chemistry, colour and reference number thus:-

Dulux Clinikill™ Antigraffiti Silver Pearl 9107113K
Or
Dulux Clinikill™ Duralloy™ Silver Pearl 9157113K

ARMOURSPRAY EP

910 LINE Dulux®Armourspray EP™ (Previously Dulux® Antigrffiti)

Armourspray™ Environmental Protection has been formulated to perform in environments where most other powders would find the going too tough or where graffiti may be a problem.

DUPOL™

954 LINE Pacificgold® Dupol™

Pacificgold® Dupol™ is a polyester grade powder coat suited to outdoor exposure on a variety of substrates.

Pacificgold® Dupol™ Polyester has a multitude of possible uses over varied substrates from steel to aluminium. Examples of the application of this chemistry includes bicycles, garden tools, lawn mowers, industrial transformers and heavy equipment, architectural finishes and automotive components.

DUPOL™ FPG

959 LINE Pacificgold® Dupol™ FPG

Pacificgold® Dupol™ FPG is a polyester casting grade powder coat suited to application to porous substrates such as galvanised steel and castings.

Pacificgold® Dupol™ FPG has been developed specifically to assist in the degassing stage associated with galvanised surfaces.

DURALLOY™
GENERATION 2

915 LINE Dulux® Duralloy™ Generation 2

Dulux® Duralloy™ Generation 2 is a UV resistant powder coating that offers a 10 year colour and 10 year film integrity warranty when applied by an Orica Powder Coatings Registered Aluminium Applicator on extruded architectural grade aluminium.

Duralloy™ is designed primarily for use on extruded aluminium, including window and door joinery and extruded aluminium panel work on residential and light commercial buildings. Duralloy™ may however, be used for a variety of purposes over varied substrates, from steel to aluminium.

PG288™

288 LINE Pacificgold® PG288™

Pacificgold® PG288™ may be used on a multitude of metal substrates: from window frames to shelving, office furniture to pool fences, whitegoods to garden tools, outdoor furniture to automotive components.

PG288™ is hardy and durable. The matt and satin finishes are ideal for use on metal areas exposed to abrasion from handling, stacking or people traffic. PG288™ is often used for shop front frames, commercial furniture and shelving.
